

Questions To Do

1. Write a function to check if a number is prime.

Return: True or False

2. Write a function that returns the LCM (Least Common Multiple) of two numbers using a loop.

3. Create a function that returns the factorial of a number using a while loop.
(No recursion allowed)

4. Write a function that takes an integer and returns the reversed number.
Input: 1234 → *Output:* 4321

5. Write a function that checks if a number is a palindrome.

6. Write a function that returns the sum of digits of a number.

7. Write a function that generates and returns a list of the first n prime numbers.

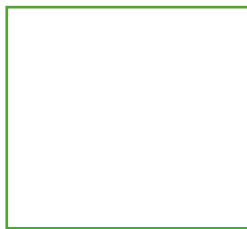

8. Write a function that prints a square number pattern with diagonals as 0, for a given size n.

1 2 3 4

5 0 0 8

9 0 0 12

13 14 15 16

9. Write a function that accepts a number and prints a pyramid pattern of that height using numbers.

Input: 4

Output:

1

1 2

1 2 3

1 2 3 4
